PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of professional experience building web applications using Next.js, React.js, TypeScript, Node.js, and REST APIs. Experienced in developing multi-tenant SaaS products, Odoo ERP integrations, analytics dashboards, customer-facing commerce platforms, and AI-assisted workflows. Built systems involving tenant isolation, authentication, dynamic data workflows, PDF processing, and Retrieval-Augmented Generation (RAG). Strong focus on maintainable TypeScript applications, responsive interfaces, API integration, and end-to-end product development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: Next.js, React.js, Tailwind CSS, Bootstrap, Redux Toolkit, Zustand, React Query

Backend: Node.js, NestJS, Express.js, REST APIs, JWT Authentication, OpenAI API

Databases: PostgreSQL, MongoDB, Redis

Architecture & Integration: Multi-Tenant SaaS, Odoo ERP Integration, RAG, API Integration, Dynamic Data Workflows

Tools & Platforms: Git, GitHub, Postman, VS Code, Docker, Electron, Cloudinary

PROFESSIONAL EXPERIENCE

Web Developer

Dec 2023 – Dec 2025

ZestyBeanz Technologies

Kerala, India

- Developed and maintained production web applications using Next.js, React.js, TypeScript, Tailwind CSS, Bootstrap, Redux Toolkit, and Zustand.
- Engineered a multi-tenant Sales Intelligence SaaS integrating Odoo ERP data with sales dashboards, analytics, customer intelligence, and product intelligence for business stakeholders. [Live Demo]
- Built an AI-powered Sales Copilot using the OpenAI API and Retrieval-Augmented Generation (RAG), grounding responses in company-specific business data to provide contextual sales analysis and decision support.
- Developed Sedeer, a customer-facing commerce portal using Next.js with Odoo as the ERP backend, integrating business data and commerce workflows into a modern web interface. [Live Demo]

SELECTED PROJECTS

IDexo – Variable Data Printing SaaS | *Next.js, Node.js, TypeScript, Electron, Cloudinary*

- Engineered a multi-tenant SaaS for variable data printing with authentication, credit-based billing, bulk Excel import, template management, and dynamic field/placeholder mapping.
- Built an Electron desktop application to offload CPU-intensive high-resolution PDF generation and processing from cloud infrastructure to client machines.
- Implemented separate approval and production PDF workflows and coordinated cloud-based SaaS workflows with local desktop processing for print production.
- Developed dynamic template workflows that map imported customer data to configurable fields and placeholders for automated document generation.
- [Live Demo] [GitHub]

Careva – Salon and Spa SaaS | *Next.js, NestJS, TypeScript, PostgreSQL, Cloudinary*

- Engineered a multi-tenant salon ERP covering POS, inventory, sales, CRM, services, appointment booking, calendar scheduling, website management, and WhatsApp customer communication. [Live Demo] [GitHub]
- Implemented wildcard subdomain support for tenant-specific SaaS environments and developed interconnected workflows across CRM, bookings, sales, inventory, and POS.

Commercial Web Applications | *Next.js, React.js, TypeScript*

- Delivered commercial applications including Pets Colony, a peer-to-peer pet marketplace, and NikahRoots, a matrimonial platform, implementing responsive customer-facing interfaces and application workflows.
- [Pets Colony] [GitHub] [NikahRoots] [GitHub]

EDUCATION

Bachelor of Technology in Computer Engineering

Aug 2019 – Mar 2023

Universal Engineering College

Thrissur, Kerala

- CGPA: 6.82
